PUBLIC WORKS BOARD

PROJECT MANAGER 2 –Mechanical Engineer
Unclassified Position
Posted 2-3-2009

ANNUAL SALARY: Up to \$94,136.00 (Employee/Employer Paid Retirement)
An Employer-Paid contribution plan is available with a reduced annual salary.

- **Recruitment Open To:** All Qualified Persons
- **Location:** Carson City
- **Full time position**
- **Applications Accepted:** Until recruitment need is satisfied.
- **Benefits:** Paid medical, dental, and vision care; life and disability insurance; eleven paid holidays; three weeks each of annual and sick leave; State retirement system (PERS); and a tax deferred compensation plan. State employees do not contribute to Social Security, but do contribute to Medicare.

The Position

This position will involve planning and implementation of various types of mechanical systems replacement projects, review of mechanical design documents submitted by outside design firms (primarily hvac, plumbing, and fire protection system designs), and assistance with implementation of mechanical systems commissioning. Since this position involves review and approval of submitted design documents on a variety of building types (office buildings, classroom and laboratory buildings, detention facilities, food service facilities, etc.) experience with the design of mechanical systems in various building types is a desired attribute for each applicant for this position.

Project Managers perform professional services in regard to design, planning, coordinating, directing, and managing the activities of construction projects and capital improvement programs. They develop project scope of work and project budgets; Develop, select, negotiate, and administer Architecture/Engineering (A/E) Contracts; Prepare, review, and approve plans, specifications, estimates, and contract documents; Coordinate and approve bid documents with regulatory and administrative agencies; Administer bidding procedures and bid openings; Provide administrative and fiscal management of construction contracts, change orders, and progress payments; Maintain established project budgets; Plan Buildings; Provide competent design services for assigned in-house projects.

To Qualify

Education and Experience

1. Licensure as a Professional Engineer by the Nevada State Board of Professional Engineers and Land Surveyors is preferred. Two years of the experience required for licensure must have included coordinating major construction projects and/or capital improvement programs involving the construction of public buildings, office complexes, and other structures.

OR

2. Candidate must have degree accepted by the Nevada Board of Professional Engineers & Land Surveyors. The candidate will be working toward licensure as Professional Engineering in the State of Nevada.
